

NETSHEDZO MMBENGWA

IT Graduate | Data Analysis | Web Developer

@ netshedzo11@icloud.com <https://www.netshedzommbengwa.live> Johannesburg, South Africa

EXPERIENCE

Freelance Web Developer

Ramphaleng Group  2024
<https://ramphallenggroup.co.za/>

- Designed and developed a polished website for Ramphaleng Group, a black youth-owned business in South Africa, increasing their reputation and service awareness in the public and private sector. Developed a clear, well-organized website that highlighted the company's objective, key clients (including governmental organizations), and range of services offered; this increased client trust and strengthened the brand's visibility.

Web Developer

Dalos Printers  2025
<https://dalosprinters.site/>

- Designed and Developed a fully responsive website for the clothing printing business Dalos Printers, expressing the company's goal of providing dependable, high-quality print solutions in a modern, innovative manner. I prioritized user experience with clear messaging around trust, punctuality, and value. I also integrated brand-consistent visual elements (logo, client and partner showcases), organized content with sections for "About," "Benefits," "Clients," "Partners," and "Contact." The final result is a polished online presence that improves customer perception, aids in lead generation, and embodies the company's basic principles of dependability and workmanship.

PROJECTS

AgriDrone (Full-speck development project)

 2023
<https://github.com/Ddmnetso/Aggridrone-PowerBI-report>

Implemented a cutting-edge system for crop health monitoring using AgriDrone (project name), ensuring early identification of stress factors and potential threats to crops.

- Built Power BI dashboards to visualize crop health data, enabling stakeholders to make resource allocation decisions with 70% accuracy.

Premier League Performance Data Analysis

 2025
<https://github.com/Ddmnetso/Premier-League-Win-Loss-Data>

Analyzed historical Premier League match data to identify performance trends, win/loss patterns, and team dynamics using Python, SQL, and Power BI.

- Created interactive Power BI dashboards to visualize seasonal trends and team rankings, enabling data-driven insights for sports analysts.

SUMMARY

I am an analytically minded graduate & junior data analyst,data scientist and web developer. Through my love for sport and gaming i have cultivated a strategic way of thinking, advanced analytical skills and unique problem solving skills. My key achievements include developing websites and using web analytics to reduce web load time by 65% and a 35% increase in average user sessions duration, and implementing a crop health monitoring system that improved identification accuracy by 70%. I am currently seeking a junior, graduate or intern position where I can bring my unique creativity, data analysis and observational skills to support your organization's mission of creating an efficient, safe, and innovative work environment where I can grow as a professional and help the organization achive it's goals.

EDUCATION

Bachelor of Information Technology (Software Development Specialization)

Belgium Campus ITVersity
 2021 - 2024

- Honors:** Cum Laude
- Achieved 24 of 39 distinctions, including in Machine Learning, Artificial Intelligence & Mathematics

Matriculated

Midrand High School
 2020

CERTIFICATES

Data Analytics Foundations Certificate
Google/Coursera

KEY ACHIEVEMENTS

**Improved Load Time**
Reduced website load time by 66% using Microsoft Clarity insights to boost user experience and engagement.

**Enhanced Crop Monitoring**
Generated Power BI dashboards improving crop health identification accuracy by 70% using data analysis tools.
